

Open Position in Darmstadt/Germany: Research Engineer for Power Systems

Energynautics is a dynamic company specializing in network integration of renewable energies as well as sustainable innovative energy concepts, such as smart grids, for instance. At the intersection of industry and research, we provide consulting services to a wide range of customers, including network operators, renewable plant component manufacturers, and governmental/non-governmental authorities.

Due to the steadily growing demand for our services, we now would like to extend our team with a new staff member. We are looking for an applicant who:

- has a university degree in electrical engineering, or a comparable subject, such as energy technology;
- has a thorough knowledge of electrical grids;
- is able to use network simulation software products, such as DigSILENT, Matlab, and PSS/E or to quickly acquire the necessary knowledge and skills;
- is proficient in English, both oral and written;
- is able to work independently on projects, prepare project documentation and reports for customers;
- has the flexibility to familiarize him-/herself quickly with new topics;
- wants to search creatively for solutions regarding innovative energy concepts.

Additionally, we would appreciate

- proven experience regarding the network integration of renewable energies;
- proven experience regarding network simulations with the above mentioned software programs.

We can offer you a position in a small, highly-motivated, creative, and open-minded team where you can actively contribute to developing the future of the energy business.

We look forward to receiving your CV, including professional experience, the desired salary and references.
